

Templars Primary School Newsletter

Dear Parents and Carers,

School dinners

We are very pleased with how the quality and variety of our hot dinners has improved this year and we are seeing record numbers of children choosing to have a school lunch now.

However we are always seeking to improve and so we would like to create a parents' group to work alongside the kitchen team to explore new options and provide feedback. We are hoping that a small group of parents will meet regularly with the Kitchen Manager and other staff to discuss options, and also join us for lunchtime to see and experience the food that is offered to the pupils. (This will have to be done in a COVID safe way of course.) If you would like to take part in this forum please contact the school office or speak to myself or Mrs Ferguson on the school gates in the mornings.

Holiday Club

As usual we are offering a half term holiday club for our pupils in February. At the moment we do not have enough children booked in to make this financially viable and so if you would like your child to attend please let Tina, or the school office, know as soon as possible.

Litter problems

Regrettably we have been made aware of problems with litter in the Lime Tree Car Park. This is mostly yoghurt pots, breakfast cereal bar wrappers and McDonalds wrappers suggesting that this may be people eating breakfast in their cars and throwing rubbish onto the car park. Yesterday Mr Weller spent some time picking the litter up - but this is not good use of his time and I would prefer he was continuing to work on improve-

ments and maintenance of Templars rather than collecting other people's waste. As I have mentioned before we are only able to use the Lime Tree car park due to the good will of the management there and they will lock the gates again if the littering does not stop.

Thank you,

Mrs Biddell

[@TemplarsPrimary](#) today STEAM club built, tested then improved their paper aeroplane designs before the final flight to see who's travelled the furthest. Well done to all but a special well done to Sam from 5S whose plane went the furthest both inside and out

Lots of fun creating Egyptian themed animations in Computing today. I really liked Luke's swimming Egyptian god! 🇪🇬 @TemplarsPrimary
